DETAILED ACTION

Specification

1. Applicant is reminded of the proper language and format for an abstract of the disclosure.

The abstract should be in narrative form and generally limited to a single paragraph on a separate sheet within the range of 50 to 150 words. It is important that the abstract not exceed 150 words in length since the space provided for the abstract on the computer tape used by the printer is limited. **The form and legal phraseology often used in patent claims, such as "means" and "said," should be avoided.** The abstract should describe the disclosure sufficiently to assist readers in deciding whether there is a need for consulting the full patent text for details.

The language should be clear and concise and should not repeat information given in the title. It should avoid using phrases which can be implied, such as, "The disclosure concerns," "The disclosure defined by this invention," "The disclosure describes," etc.

Claim Objections

2. Claims 24-29 are objected to because of the following informalities: In **claim 24**, line 4, "the signals" should be changed to --signals--. In line 7, "the transmit" should be changed to --transmit--. In line 8, "the transmit" should be changed to --transmit--. In line 10, "the time" should be changed to --time--. In **claim 25**, line 4, "the signals"

should be changed to --signals--. In line 8, "the broadcast" should be changed to --broadcast--. In lines 8-9, "the personalized" should be changed to --personalized--. In **claim 26**, line 4, "the signals" should be changed to --signals--. In line 9, "the broadcast" should be changed to --broadcast--. In **claim 27**, line 4, "the signals" should be changed to --signals--. In line 9, "the OFDM" should be changed to OFDM. In **claim 28**, line 4, "the signals" should be changed to --signals--. In **claim 29**, line 4, "the signals" should be changed to --signals--. In line 9, "the transmit" should be changed to --transmit--. ***Appropriate correction is required.***

Information Disclosure Statement

3. The listing of references in the specification is not a proper information disclosure statement. 37 CFR 1.98(b) requires a list of all patents, publications, or other information submitted for consideration by the Office, and MPEP § 609.04(a) states, "the list may not be incorporated into the specification but must be submitted in a separate paper." Therefore, unless the references have been cited by the examiner on form PTO-892, they have not been considered.

Allowable Subject Matter

4. Claims 19-23 are allowed. Once the objection to claims 24-30 are overcome, those claims would be in condition for allowance.

Conclusion
